SUMMARY

Final-year Computer Science Engineering student specializing in Artificial Intelligence and Data Science with strong foundations in Machine Learning, Data Science, Generative AI, NLP, Retrieval-Augmented Generation (RAG), and Data Analytics. Experienced in building end-to-end AI solutions using Python, SQL, LangChain, and modern ML libraries. Passionate about solving real-world business problems through data-driven decision making and intelligent AI systems.

TECHNICAL SKILLS

Programming Languages: Python, SQL, C, C++

Data Science: Data Analysis, Exploratory Data Analysis (EDA), Data Cleaning, Feature Engineering, Statistical Analysis, Data Visualization, Power BI

Machine Learning: Regression, Classification, Model Evaluation, Scikit-learn, NLP, Deep Learning Fundamentals

Generative AI: Retrieval-Augmented Generation (RAG), Large Language Models (LLMs), Prompt Engineering, Semantic Search, LangChain, LangGraph, Agentic AI, Model Context Protocol (MCP)

Databases: SQL, PostgreSQL, MongoDB

Libraries & Tools: NumPy, Pandas, Scikit-learn, Matplotlib, seaborn, GitHub, Jupyter Notebook, Google Colab, VS Code

PROJECTS

RAG-Based AI Teaching Assistant

Python – LangChain – NLP – RAG – LLMs

Developed an AI-powered teaching assistant that answers questions using uploaded educational video content.

Built an end-to-end Retrieval-Augmented Generation pipeline with semantic search and speech-to-text processing.

Integrated context-aware response generation to improve accuracy and reduce hallucinations.

Implemented NLP, vector retrieval, and AI-powered question answering using LangChain.

Github link: <https://github.com/MRPerfectionist45/RAG-Based-AI-Teaching-Assistant-System>

House Price Prediction using Machine Learning

Python – Pandas – Scikit-learn

Developed a machine learning model to predict residential property prices using historical housing datasets.

Performed data preprocessing, feature engineering, and exploratory data analysis.

Applied regression algorithms and evaluated model performance for accurate predictions.

Github link: <https://github.com/MRPerfectionist45/House-Prediction-ML-model>

SaiKrupa Suzuki Dealership Website

HTML – CSS – JavaScript

Designed and developed a responsive dealership website with an animated product showcase.

Implemented EMI calculator, bike comparison, WhatsApp enquiry, and online booking features.

Successfully deployed the website on Netlify with a mobile-first responsive design.

EXPERIENCE

Data Science & Machine Learning Virtual Intern

Eduskills

May 2026 – Jun 2026

Virtual internship

Completed hands-on training in Machine Learning, Python, Data Science, and AI fundamentals.

Worked on data preprocessing, exploratory data analysis, feature engineering, and predictive modeling.

Developed practical knowledge of supervised learning algorithms and model evaluation techniques.

Strengthened skills in Python, Pandas, NumPy, Scikit-learn, and data visualization.

EDUCATION

JSPM University, Pune <i>B.Tech in Computer Science Engineering (Artificial Intelligence & Data Science)</i>	2023 – 2027 CGPA: 8.50
Modern College, Pune <i>Higher Secondary Certificate (HSC)</i>	2020 – 2022 71.84%
SJH Gurunanak High School, Pune <i>Secondary School Certificate (SSC)</i>	2010 – 2020 92.40%

CERTIFICATIONS

- Ultimate Data Science and Gen AI Bootcamp - Krish Naik Academy
- Complete Data Science Bootcamp – CodeWithHarry
- Python Programming with Object-Oriented Programming (OOP) – CodeWithHarry
- SQL and Relational Database Certification
- Complete AI Automation & Agentic AI Bootcamp
- n8n Production Mastery: From Zero to Hero – Agency Ready in 30 Days
